REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

In response to the appeal brief, the examiner re-examined the question of whether the cited Flash EPROM of Bacon et al., U.S. 5,440,632, was synchronous or asynchronous. The examiner determined that the Flash EPROM was more likely to have been asynchronous than synchronous since:

- (a) there was no clock signal input into the Flash EPROM *itself*;
- (b) the Flash EPROM required a "write enable" pin;
- (c) AMDTM manufactured asynchronous Flash EPROMs, which could have been used in the Bacon et al. system.

The references cited on the attached form PTO-892 have been carefully considered but are not deemed to teach each and all of the limitations of the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
